## Description

### 2026 Variant 2700kg Plant & Machinery Trailer

Move the machine. Get back to work.

1,927 kg of payload on a platform designed for earthmoving and construction equipment. The loading height, deck width, and ramp configuration are built around what you are actually putting on it.

#### **Low loading height. Rear ramp loading.**

Most compact machinery rolls on without a loading dock. The rear ramp drops, your machine drives on. Gas struts hold the ramp in position. Fast, predictable, doable solo.

#### **Mechanical overrun brakes — self-regulating, no controller required.**

#### **Hot-dip galvanised. Parabolic leaf spring suspension. LED lighting.**

Galvanised throughout for job site use and all-weather storage. Suspension absorbs rough site access roads.

Danish-designed. RVSA 2023 compliant. Ready to register.
