Description

2026 Variant 3518 M4 3500 kg Machine Transporter Trailer

Move the machine. Get back to work.

2,653 kg of payload on a platform designed for earthmoving and construction equipment. The loading height, deck width, and ramp configuration are built around what you are actually putting on it — not what fits in a catalogue description.

Low loading height. Rear ramp loading.

Most compact machinery rolls on without a loading dock. Rear ramp drops, your machine drives on, gas struts hold it in position. Fast, predictable, doable solo.

KNOTT mechanical overrun brakes — no brake controller, no wiring, no compatibility checks between vehicles.

Hot-dip galvanised. KNOTT Parabolic Leaf Spring. LED lighting.

Danish-designed. RVSA 2023 compliant. Ready to register.
