Description

Komatsu D20A-7 dozer with Rippers Japanese manufactured. 40 HP Komatsu Diesel engine. Low hours. Nice little machine for someone who has a small to medium farm property and wants to put in their own improvements or a residential civil contractor that needs to work around tight spaces. Acreage workhorse. Gumtrees (4-12") and lantana are no problem, depending on work conditions and tree species. This is the Direct Drive Transmission model. This is a standard shift, where you operate a foot clutch and shift with a lever mounted on the floor. Very similar to a standard shift truck and same benefits. Simple, long lasting and more power to the running gear. Very durable and idea for remote location use. The 3rd forward speed is very fast for overland travel. . 6 Way Blade . Steel Canopy . NEW Heavy Duty Rippers - specifically designed for this machine to give maximum depth . Tree Spear Available . General Workshop Check & Service . Digital Spare Parts Manual Included (parts readily available through Komatsu Australia) Wholesale Price-------$POA +GST Due to staff shortages, inspections are by prior arrangement only
